

COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

THE APPLICATION OF BUFFALO TRAIL WATER)	
ASSOCIATION, INC. OF ROBERTSON AND)	
MASON COUNTIES, KENTUCKY, FOR A)	CASE NO.
CERTIFICATE OF PUBLIC CONVENIENCE AND)	95-217
NECESSITY, FOR AN ORDER APPROVING)	
ISSUANCE OF EVIDENCE OF INDEBTEDNESS)	

O R D E R

IT IS ORDERED that Buffalo Trail Water Association, Inc. ("Buffalo Trail") shall file an original and 10 copies (two copies of engineering-related materials) of the following information with the Commission, with a copy to all parties of record within 21 days from the date of this Order. Buffalo Trail shall furnish with each response the name of the witness who will be available at the public hearing, if one is held, for responding to questions concerning each item of information requested.

1. Provide appropriate contract specifications for the approximately 6 miles of water line Buffalo Trail proposes to construct. If the standard specifications filed in Case No. 94-094 are being utilized for this project, so state and it will not be necessary to file additional copies.

2. Buffalo Trail proposes to install approximately 880 feet of 2-inch water line on Fields Lane. Two-inch non-circulating water lines longer than 250 feet and 2-inch circulating water lines longer than 500 feet violate 807 KAR 5:066, Section 10(2)(a). It appears that a 3-inch or larger line should be installed. Provide evidence that the line complies with 807 KAR 5:066, Section

10(2)(a) or an amended proposal which complies with the regulation. Also provide information concerning the possibility for future extension of this line.

3. Provide the final summation of the total cost of construction and funding arrangements ("the Final Engineering Report").

4. It is unclear whether Buffalo Trail proposes to install fire hydrants as part of this project. 807 KAR 5:066, Section 10(2)(b), states in part "[f]ire hydrants may be installed by a utility only if: a. A professional engineer with a Kentucky registration has certified that the system can provide a minimum fire flow of 250 gallons per minute; and b. The system supporting this flow has the capability of providing this flow for a period of not less than two (2) hours plus consumption at the maximum daily rate."

If fire hydrants are part of the proposed project, provide evidence that Buffalo Trail's system meets the requirements of 807 KAR 5:066, Section 10(2)(b).

Done at Frankfort, Kentucky, this 5th day of July, 1995.

PUBLIC SERVICE COMMISSION
